

# Installations Case Study

## FOURMI® Gondola System

### Overview:

Recruit Retail Services utilises the revolutionary FOURMI® gondola moving system to support our clients' store development activity. Specially designed 'skates' are positioned strategically under lengths of gondola, which can then be rolled into a new location quickly & easily.

### Client benefits:

The use of the FOURMI® system saves hours in demerchandising and deconstruction time, as well as requiring smaller team sizes. This dramatically reduces the length and cost of the project, and because your new layout will be finished earlier, produces a quicker return on investment.

### Uses:

From store revamps, to seasonal changes. Improving the customer flow around your store, or simply cleaning underneath fixtures. The FOURMI® system allows Recruit Retail Services to support your activity without disrupting your staff schedules or customer experience.

### Why RRS:

As leaders and innovators in our industry, Recruit Retail Services recognises the benefits of such a radical system, and are happy to promote it's use to our clients.
